

Fushan International Energy Group Limited Was Included As A Constituent Stock of Hang Seng Composite Index

(18 February 2009, Hong Kong) Fushan International Energy Group Limited (“Fushan Energy” or the “Company”; stock code: 639.HK) is pleased to announce that the Company was included as a constituent stock of Hang Seng Composite Index by Hang Seng Indexes Co. Ltd.. In terms of industries, the Company will be classified under “Energy”. In geographical terms, it will be classified as a constituent stock of Hang Seng Mainland Composite Index or Hang Seng Mainland Freefloat Index. Such changes will take effect on 9 March 2009 (Monday).

Following the successful strategic business transformation of Fushan Energy, its business development always maintains steady growth momentum. The Company has three coal mines in Liulin County, Shanxi Province and the combined designed capacity is 6.3 million tons of raw coal per annum. The inclusion of Fushan Energy as the Constituent Stock of the Hang Seng Composite Index has proven that the prominent growth of results and its stable return of investment have achieved the extensive recognition of Hong Kong and international investors.

In view of Fushan Energy’s being selected as the Constituent Stock of the Hang Seng Composite Index, Mr. Wong Lik Ping, the Chairman of Fushan Energy, said, “In an international capital market, the Hang Seng Composite Index is an important benchmark which numerous sizable funds and investment portfolios refer to. Fushan Energy is motivated and proud of having been enlisted as the Constituent Stock of the Hang Seng Composite Index, and I would like to extend my sincere gratitude to investors and all walks of life for the long-standing support they have bestowed on us. Subsequent to the Company’s inclusion as the Constituent Stock of the Hang Seng Composite Index, investors’ confidence in the Company is set to surge. In an attempt to gain bullish support from more quality funds, the Company will facilitate a deeper understanding of its business potentials among investors by increasing transparency in terms of corporate governance.”

Looking forward, Mr. Wong continued, “The Company has a veteran management team and is thus blessed with considerable advantages when devising the Company’s development strategies. The Company will further expand its sales network and form cost effective operation strategies in line with market conditions, so as to consolidate and develop coking coal business as its principal business to such end as to endeavor for maximized shareholders interests.”

About Fushan International Energy Group Limited

Fushan Energy is principally engaged in the production and sales of coking coal and related side products. It is the second largest hard coking coal producer in China in terms of production capacity and has three coal mines in Liulin County, Shanxi Province. The current combined designed capacity of the three coal mines is 6.3 million tons of raw coal per annum. According to the Technical Review Report of the John T. Boyd Company based on the standard of JORC, the total recoverable reserves of the three coal mines was 142.4 million tons as at the end of 2007, comprised with mainly hard and semi-hard coking coal. The Group currently owns a coal preparation plant in Shanxi Province. The first phase of the coking plant in Shanxi Province has already commenced production since July 2008. Besides, the Group is constructing three new coal preparation plants. The three coal preparation plants will be completed and commence production by the third quarter of 2009 respectively, upon which the Company's output of cleaned coal will be increased substantially.
